

BEFORE WE START THE NHS APP...

ANDROID CHECKLIST

A quick pre-check to make sure your phone is ready

If you can answer YES to all 6 checks, we can usually go ahead and install and set up the NHS App together.

CHECK	YOU	QUICK CHECK & TIPS	WHO OWNS IT?
1 	Can you unlock your phone? YES ☐ NO ☐	- Try unlocking with your usual method (PIN, pattern, password, fingerprint or face). - If you can't unlock it, we can't move forward.	Android / Device security If you've forgotten your unlock method, you may need device owner help or a reset.
2 	Can you access your email? YES ☐ NO ☐	- Open your email app or website. - You'll need this to receive verification emails.	Email provider If you can't sign in, recover your email account first.
3 	Can you receive text messages (SMS)? YES ☐ NO ☐	- We may need a code sent by text to verify your identity. - Check signal and that your phone number is working.	Mobile network / NHS If texts aren't arriving, check signal, number settings or network with your provider.
4 	Can you install an app from Google Play? YES ☐ NO ☐	- Open Google Play Store. - Try installing a free app. - If asked for authentication, you may need PIN, pattern, fingerprint or face recognition. See overleaf for help	Google / Android If you can't install apps, we'll check authentication or account issues.
5 	Does your camera work? YES ☐ NO ☐	- We'll use it to take photos of ID for the NHS App. - Try opening your camera and taking a photo.	Android / Device If it doesn't work, check permissions or speak to device owner.
6 	Are you connected to the internet? YES ☐ NO ☐	- Check Wi-Fi or mobile data is on. - Try opening a website in your browser.	Internet / Network If you can't connect, check Wi-Fi, mobile data or contact your provider.

ALL YES?

Great! You're ready.
We can install and set up the NHS App together.

SOME NO?

Let's sort the issue first.
We'll identify what's getting in the way and the next best step.

NOT SURE?

That's OK.
We'll explore it together and find the right help.

HELPFUL REMINDER

This checklist is to help us get you ready for the NHS App. Some issues are related to Google, Android or your device rather than the NHS App itself.

OUR ROLE

We'll help you identify the issue and signpost you to the best next step.

USEFUL CONTACTS

- Your mobile network provider
- Google Support: support.google.com
- Device manufacturer support
- Friends / family / carer

We're here to help you navigate, not to leave you stuck.

You're not alone in this.

CHECK 4 EXPANDED

4

Can you install an app from Google Play?

This check is important because we need to install the NHS App.

Why Google Play asks for authentication

Google Play asks for authentication to keep your phone and your account safe. It helps prevent other people from installing apps or making changes.

Google Play asks for authentication – what to do

When you try to install an app, you might be asked to prove it's you.

You can usually sign in using one of the options below.

1. Fingerprint

Use your registered fingerprint.

OR

2. Face recognition

Use your registered face.

OR

3. PIN or pattern

Enter your screen PIN, pattern or password.

OR

4. Google password

Enter your Google account email and password.

If you can't use fingerprint or face recognition

A. Try another method

- Use "Use PIN / Pattern / Password" instead (the exact wording may vary).
- Or choose "Use Google account instead".

Verify it's you
Use your fingerprint to continue

Use PIN

Use Google account instead

B. Fix fingerprint

- Make sure your finger and the sensor are clean and dry.
- Try a different finger.
- Re-register your fingerprint:
 - 1 Go to Settings > Security (or Biometrics and security)
 - 2 Tap Fingerprints
 - 3 Follow the steps to add your fingerprint again.

C. Fix face recognition

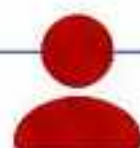

- Make sure your face is clearly visible in good light.
- Remove glasses or anything that might block your face.
- Re-register your face:
 - 1 Go to Settings > Security (or Biometrics and security)
 - 2 Tap Face recognition
 - 3 Follow the steps to add your face again.

If you still can't install apps

1. Check settings

- Open Google Play Store.
- Tap your profile icon (top right).
- Tap Settings > Authentication.
- Make sure "For all purchases through Google Play on this device" is set to a method you can use.

2. Check parental controls

Parental controls can block app downloads.

- 1 Open Google Play Store.
- 2 Tap your profile icon.
- 3 Tap Settings > Family > Parental controls.
- 4 Check that downloads are allowed.

3. Check your Google account

Make sure you're signed in with the right Google account.

- Tap your profile icon.
- Check the email address.
- If needed, tap the arrow next to your account name and sign in to the correct account.

4. Update if needed

- Open Settings on your phone.
- Tap System > Software update.
- Install any available updates.
- Then try Google Play again.

Still not working?

- Restart your phone and try again.
- If it still doesn't work, ask a family member, carer or trusted person to help.
- You can also get help from Google Support: support.google.com

When you can install apps

Once you can install an app:

- 1 Open Google Play Store
- 2 Search for "NHS App"
- 3 Tap Install

Need help from your GP practice?

We can help with NHS App setup and signposting, but we may not be able to fix Google or device issues.

We're here to help you move forward

Once your device is set up, we'll be happy to help you install and use the NHS App.
