

Your NHS App Journey

The right guide at the right time

Practical guides and checks to help you set up and use the NHS App with confidence

About the NHS App

It's more than an app. You can use the same NHS account on a smartphone, tablet or through a web browser on a computer. Your choice can change over time.

1

Getting Started with the NHS App

A short overview to help you understand the NHS App and decide your next step.

Choose how you would like to access your NHS account

Smartphone – iPhone

You'll need to install the NHS App from the App Store.

Smartphone – Android

You'll need to install the NHS App from Google Play.

Computer or tablet

(Web browser)

No app to install. Use a web browser on your device.

Apple Readiness Checklist
(6 quick checks)

Android Readiness Checklist
(6 quick checks)

No readiness checklist needed

Is your device ready?

(Answered YES to all checks, or you are using a web browser)

Yes – go ahead

No – one or more issues

Identify the issue and signpost to the right source of support (see panel on right).

Create and verify your NHS account

This happens during G1 or G2 or G3, depending on the route you choose.

G1

Self-Help Guide

For people who want to set it up themselves.

G2

Support Guide

For people who would like help from a volunteer, family, friend or other support.

G3

Preparation Guide

For people who need to prepare before setting up, including getting details from their GP practice.

4

G4 Using the NHS App

Get the most from the NHS App with guidance on key features, settings and everyday use.

We're here to help you navigate, not to leave you stuck.

Wherever you are on your journey, you're not alone.

Guides at a glance

- 1 Getting Started

- Android Readiness Checklist
- Web browser (no checklist)

Our role and boundary

We are here to help you navigate the NHS App journey.

We can:

- Explain the journey
- Help you use our guides
- Check device readiness
- Identify what might be stopping progress
- Signpost to the right source of support

We don't:

- Change phone settings
- Reset passwords or accounts
- Troubleshoot device faults
- Provide technical support for Apple, Android, networks or email

Who can help?

- Apple Support support.apple.com
- Google Support support.google.com
- Mobile network provider
- Email provider
- Your GP practice
- Local library or community service
- Family member or friend
