

G2 — Support Guide: Getting help with the NHS App

Reepham & Aylsham
Medical Practice PPG

Working together
for our patients

This guide explains where and how you can get help to create your NHS account or use the NHS App.

You stay in control — enter your own passwords and security codes.

1 Choose your helper

You can ask a volunteer, family member, carer, trusted friend, your GP practice, local library or NHS App support.

2 Say what help you need

Let your helper know which part you need help with.

This might be to:

- Create your NHS account
- Connect to your GP records
- Verify your identity
- Use an NHS App service
- I'm not sure

3 Keep your account secure

Let the helper explain the steps, but enter your own:

-  **Password**
-  Text-message security codes (one-time codes)
-  Linkage Key/Passphrase (if used)

Never share your passwords, codes or passphrases with anyone.

4 Choose your identity-check route

Using photo ID

You will need:

- Access to your email
- A phone or tablet that can receive text messages
- Suitable photo ID
- A steady hand and sufficient eyesight – or help from someone you trust – to take a clear image and complete the face scan or short video.

Without submitting photo ID

You will need:

- Access to your email
- A phone that can receive text messages
- Your GP online-services details:
 - Account ID
 - Practice ODS Code
 - Linkage Key or Passphrase.

Ask the Practice for these. The Linkage Key or Passphrase usually expires after 14 days.

5 Contact the right service

	Volunteer, family member, carer or trusted friend	Help while you complete the steps yourself. They can talk you through the process, but you enter your own details.
	GP practice	GP-held details, record connection, registration details or Practice services. Waiting-room drop-ins and pre-arranged workshops will be available shortly; check with the Practice or PPG.
	Local library	Computer access, internet access and basic digital help. Resources may be limited.
	NHS App support	Help with your account, sign-in or technical problems. Phone: 0300 123 1672 (8am–8pm, 7 days a week) Website: www.nhsapp.service.nhs.uk

6 Afterwards

- Sign out on shared devices.
- Keep your security details private.
- Use **G4** for help with a particular NHS App service, or **G3** if you are not ready to begin.
