

G3 — Preparation Guide: Getting ready

This guide is for people who need to prepare before creating or using their NHS account.

1

Check what you have

You will need:

- internet access
- your own email address
- access to that email account
- a mobile phone that can receive text messages

Do not use another person's email address or a shared email address.

2

Check your details

Make sure your name, date of birth, address, postcode, mobile number and email address match the details held by your GP practice.

Contact the Practice if anything needs updating.

3

Choose your identity-check route

Using photo ID: suitable photo ID and a phone or tablet with a camera.

Without submitting photo ID: your Account ID, Practice ODS Code and Linkage Key or Passphrase from the Practice. The Linkage Key or Passphrase usually expires after 14 days.

4

Keep your details secure

Enter your own password and text-message security codes. Do not share them with anyone.

5

Get help if needed

Ask a volunteer, trusted person, your GP practice, local library or NHS App support.

When you are ready

Use G1 to continue by yourself, or G2 if you would like help.

G1

Self-Help Guide

Work through the process yourself.

G2

Support Guide

Find out what help is available.

G3

Preparation Guide

Check what you need before starting.

G4

NHS App Guide

Follow task-specific guidance and NHS videos.

Please ask a volunteer if you need some help
