

G4 — Using the NHS App

This guide assumes that you have completed NHS App setup, including identity verification, and have logged in successfully.

Services may vary between GP practices.

1

Repeat prescriptions

Select **Prescriptions**, choose the medicine you need, check your nominated pharmacy and submit your request.

2

Read and send messages

Select **Messages** to read information and requests from NHS services.

Where available, you can also reply to or send messages.

Turn on notifications so you know when a new message arrives.

3

View your GP health record

Select **Your health**, then **GP health record**.

You may be able to view:

- medicines
- test results
- documents
- allergies
- consultations
- immunisations

4

View appointments

Select **Appointments** to check the date, time, location and type of appointments already arranged.

You may also be able to cancel or change some appointments.

5

Book appointments

Some appointment types may be available through **Appointments**. Select **Book an appointment** if the option is shown.

?

Need help?

Contact **NHS App support** for login or technical problems.

Contact **your GP practice** about prescriptions, appointments, messages or information in your record.

Keep your account secure

Never share your password.
